

WAGU® Flap Valve, Circular Type

With plain flap and flange connection.

Structure Recesses

Flange connecting dimensions
to DIN 2501, PN 10
(other connecting dimensions on request)

Mounting Instructions

- WAGU Flap Valves with flange connection can be used as end-of line valves only.
- Place the Flap Valve at the wall or pipeline flange and align.
- The counter flange has to be vertical and plane-parallel, the fastening holes have to be arranged off centre.
- For fastening, connecting bolts, hexagon nuts, washers, and seals according to the corresponding standard (DIN etc.) have to be used.
- On request, we'll supply fastening parts and seal, too.
- The connecting bolts have to be tightened crosswise and evenly.
